

DANCO

Medical

A Lincotek Company

The leader in metal finishing

Providing a wide range of surface preparation and coating techniques

Headquartered in Warsaw, Indiana, USA, Danco Medical has been meeting the needs of medical device companies for technically superior surface preparation and finishing, providing titanium and aluminum anodizing of machined parts, implants, instruments and devices, as well as electropolishing, passivation and low friction chrome coating. Danco Medical has invested in a second production site in Warsaw, IN, where we added a fully automated aluminum anodizing line.

The new equipment will not only add capacity within aluminum anodizing, but also deep image graphics, which is the industry leading graphics process used on orthopedic delivery systems. Well known for our ability to maintain quality requirements, to meet short deadlines and to retain detailed records, Danco Medical with around 175 employees, maintains our facilities in Warsaw to ISO 13485:2016 certification standards.

A Lincotek Company

ISO CERTIFIED | ROHS - REACH COMPLIANT

Capabilities and validated processes

Color Titanium Anodizing	Deep Image Graphics
Type II Titanium Anodizing	Type II Sulfuric Aluminum Anodize
Titanium Lined Spinal Rod Process	Type III Hard Coat Aluminum Anodize
New Fully Automated Type II and Type III Aluminum Anodizing Lines	
Electropolish	PTFE Coating
Citric Passivation	Epoxy Painting
Nitric Passivation	HA ^{nano} Surface Treatments
Laser Marking	Manufacturing Cleaning Effectiveness
Low Friction Chrome Coating	ISO 13485:2016
Chemical Conversion Coating	NADCAP Accreditations

Applications

Medical and dental firms find that Danco Medical has the capability to exactly meet their needs for quality, delivery and price. With an almost unlimited resource of surface preparation and finishing techniques, as well as a wide range of product identification methods, Danco Medical is prepared to meet your total needs from design evaluation through finished, packaged products.
